

pig.net[®]

the coordinated system

Successful supply chains understand efficiency and discipline. Being the best is not just about what you do best. It's about connecting with others. It's about leveraging resources. It's about coordinating a food system. And the Pig.net[®] system does just that.

The Pig.net[®] system connects customers with specialized production sites – farrowing or finishing – through a wean-to-finish production flow. Rather than expending hours on sourcing pigs, deciding marketing options, gaining production insight and formulating the right diets, the Pig.net[®] system simplifies these answers. A proven supply chain, defined marketing plan and worldclass pork production provide the cornerstones. A simple system that allows you to experience - *what coordinate with confidence means.*

Proven Supply Chain

Efficient supply chains continue to create value - throughout the chain. The Pig.net[®] system provides entrepreneurs the business model to collaborate on producing a premier pork product. This collaboration leads to the right value – from financial to lifestyle. *Connect with confidence.*

Worldclass Pork Production

Disciplined production practices lead to the best animal productivity. Gaining access to expertise in live production – such as in-barn environment, production management and nutrition – allows the supply chain to remain cutting-edge. *Produce with confidence.*

Defined Marketing Plan

Sustainable supply chains depend upon a fair price discovery mechanism. And to do just that - the pricing matrix works in concert with the market window – backed by Cargill. Over the long-term, this equates to a weaned pig price between \$25 and \$40, while the finisher experiences a return per pig space around \$48. *Market with confidence.*

The Winning Mindset

Winners understand that it's how you play the game. You have to play smart.

Being the best is not just about doing what you do best. It's about connecting with others to benefit from what they do best.

Inner resourcefulness leads you to outside resources. Expertise in defining measures. Aligning goals. Applying technologies. Delivering unique solutions.

That's what the Pig.net® system delivers. A coordinated system. Connect your specialized production site – farrowing or finishing – into the best pork system. Connect with strength. *Coordinate with confidence.*

Farrowers Win

Through the Pig.net® experience:

- Connect into a coordinated system.
- Market your weaned pigs with the Pig.net® pricing matrix – discover the weaned pig price from market hog revenue less model production costs less return to finisher – between \$25 and \$40 per weaned pig.
