

Supplier Selection

Better ingredients. Lower cost.

Supplier Selection

Supplier Selection, delivered through the Cargill® Nutrition Cloud™, helps you compare suppliers and manage ingredient variability on one platform. View nutrient values across suppliers to make informed purchase decisions so you can buy with confidence.

Choose one or more suppliers and move nutrient data to your formulation system, making diet design easy.

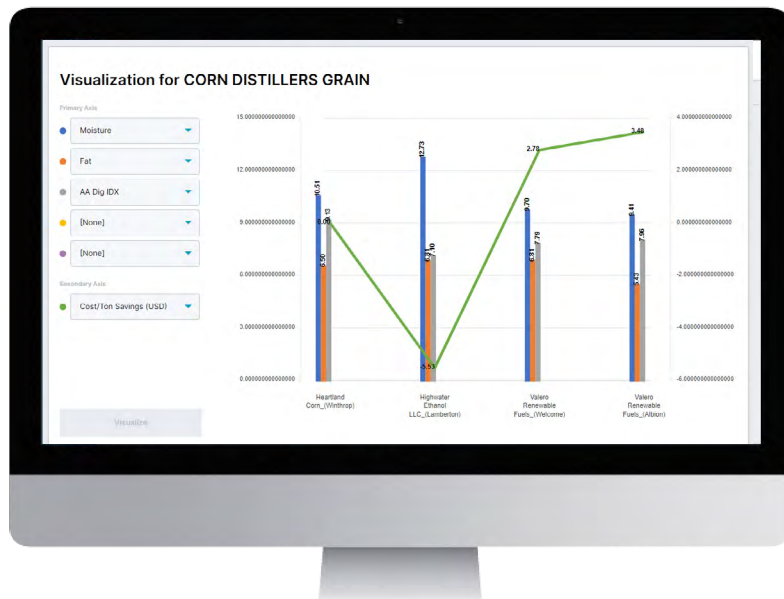

Key Advantages

- **Extensive** – Global supplier database includes more than 2.5 million samples analyzed per year.
- **Integrated** – Supplier data is connected to nutrient calculation engine and optional formula optimization services, so you can send information to your formulation system or our team of specialists.
- **Convenient** – Update costs and run new comparisons either as a service through Cargill, or on your own.
- **Efficient** – Save previous scenarios so you can quickly evaluate suppliers based on cost or nutrient changes.
- **Cost Effective** – Select the supplier that provides the best value for your formulas based on your goals.

How it Works

Create new comparisons using an easy step-by-step workflow that guides you to:

- Select the location(s) from where you want to purchase ingredients
- Choose ingredients and suppliers you want to research
- Select your formula
- Compare with current suppliers
- Run cost scenarios

Comparison for CORN DISTILLERS GRAIN

Supplier	CURRENT			BEST COST BEST PROTEIN	
	Heartland Corn, Winthrop	Highwater Ethanol LLC, Lumberton	Valero Renewable Fuels, Wabaco	Valero Renewable Fuels, Albiom

Histidine	1.17	1.17	1.13	1.19	
Isoleucine	1.17	1.17	1.13	1.19	

Use previous comparisons and update costs if they have changed. Supplier Selection then evaluates ingredient suppliers based on the impact they have on your formulas and compares alternate suppliers using cost updates within the scenarios under consideration. This makes it easy to see the relative value of using different suppliers. Supplier Selection accounts for supplier history, variation, and quality.
