

# Swine Report Dashboard

## Nursery & Finishing

Better visualization of nursery and finishing production data to make more informed decisions.

### KEY ADVANTAGES

- Easy access through Cargill Nutrition Cloud™
- Interactive and live reports
- Wide number of filters to help drill down on the data
- Automatic daily update for MetaFarms users
- Easy-to-read and understand tables and graphs that show important metrics
- Ability to compare data to MetaFarms averages

### HOW IT WORKS

Manage all nursery and finishing performance data in a live and interactive way that is updated daily.

- Data is broken up into **Snapshot, Closeouts, Mortality, Kill Sheet and Benchmarking**
- The snapshot section overviews important metrics
- The closeout section allows a producer to look at data in either graphs or tables (ranking) by flow, barn, or group with color-coding to help make decisions
- The mortality section shows all mortality by barn and week for each flow and gives reasons for the deaths to help producers make decisions while the pigs are still in the barn
- The Kill Sheet section puts carcass info into an easy, digestible overview that shows how the market has been going
- Benchmarking takes the producer's data and compares it to the MetaFarms averages

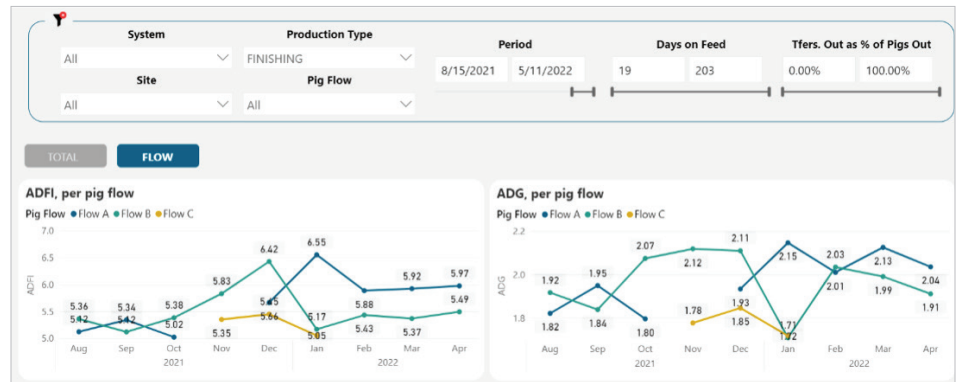

# Swine Report Dashboard

## Nursery & Finishing

Easily compare performance metrics between pig flows.

Quickly rank groups, flows or sites by various metrics.
